SUMMARY

Machine learning engineer who takes models from research to production, with a focus on scalable training pipelines, model serving and monitoring.

CORE COMPETENCIES

Core: Computer Vision, SQL, AWS, PyTorch
Tools & Platforms: Machine Learning, Deep Learning, MLOps, Docker
Also familiar with: Spark, Python, Kubernetes

EXPERIENCE

Lumen Health — Machine Learning Engineer (07/2025 – Present)

- Containerised inference services with Docker and Kubernetes, reducing p95 latency by 60%.
- Trained Deep Learning models for image classification using PyTorch; improved F1 by 12% over the previous baseline.
- Created feature pipelines with Spark and Airflow feeding a Feature Engineering layer shared by 10 models.

Tech: Python, PyTorch, Machine Learning, Kubernetes, Scikit-learn

Pinecrest Media — Machine Learning Engineer (02/2024 – 06/2025)

- Trained Deep Learning models for image classification using PyTorch; improved F1 by 16% over the previous baseline.
- Built and deployed Machine Learning ranking models in Python and PyTorch serving 36M predictions per day, lifting click-through rate by 14%.

Tech: Python, PyTorch, Machine Learning, MLflow, Deep Learning

ACADEMIC BACKGROUND

- MS in Electrical Engineering — Pune University (2022 – 2024)
- BS in Electrical Engineering — Anna University (2018 – 2022)
