PROFESSIONAL SUMMARY

DevOps / SRE engineer automating cloud infrastructure, delivery pipelines and observability.

CORE COMPETENCIES

Core: AWS, Datadog, Helm, Docker
Tools & Platforms: Prometheus, Kubernetes, Linux
Also familiar with: Jenkins, CI/CD, Terraform

WORK EXPERIENCE

Vertex Fintech — DevOps Engineer (07/2025 – Present)

- Built CI/CD pipelines in Jenkins and GitHub Actions cutting deployment time by 40%.
- Hardened Docker images and rolled out autoscaling, saving 36% cloud spend.
- Operated Kubernetes clusters with Helm and Argo CD GitOps workflows for 51 services.

Tech: Kubernetes, Terraform, AWS, Infrastructure as Code, Python

Greenfield Energy Tech — DevOps Engineer (02/2024 – 06/2025)

- Built CI/CD pipelines in Jenkins and GitHub Actions cutting deployment time by 33%.
- Implemented Observability with Prometheus, Grafana and Datadog; reduced MTTR by 53%.

Tech: Kubernetes, Terraform, AWS, Prometheus, Git

PROJECTS

- Self-service platform for ephemeral environments using Kubernetes and Terraform.
- Cost-reporting tool in Python for AWS accounts.

EDUCATION

- Bachelor of Engineering in Electronics — VIT Vellore (2019 – 2023)

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- Certified Kubernetes Administrator (CKA)
