SUMMARY

DevOps / SRE engineer automating cloud infrastructure, delivery pipelines and observability.

TECHNICAL SKILLS

Core: Ansible, Bash, Docker, Linux
Tools & Platforms: Python, Jenkins, Amazon Web Services, continuous integration
Also familiar with: Terraform, Observability, k8s, Argo CD

WORK EXPERIENCE

Senior Site Reliability Engineer | Finch & Co. Technologies | Feb 2025 – Present

- Led on-call rotations and blameless post-mortems; achieved 99.95% availability.
- Provisioned multi-account Amazon Web Services infrastructure using Terraform (Infrastructure as Code), reducing environment setup from days to 64 minutes.
- Hardened Docker images and rolled out autoscaling, saving 39% cloud spend.

Tech: Kubernetes, Terraform, Amazon Web Services, Observability, Datadog

DevOps Engineer | Meridian Bank | Feb 2021 – Jan 2025

- Led on-call rotations and blameless post-mortems; achieved 99.95% availability.
- Built continuous integration pipelines in Jenkins and GitHub Actions cutting deployment time by 46%.
- Provisioned multi-account Amazon Web Services infrastructure using Terraform (Infrastructure as Code), reducing environment setup from days to 61 minutes.

Tech: k8s, Terraform, Amazon Web Services, Argo CD, Bash

SELECTED PROJECTS

- Cost-reporting tool in Python for Amazon Web Services accounts.

EDUCATION

- BS in Information Technology — University of Edinburgh (2016 – 2020)
