SUMMARY

8+ years of experience. Data scientist who turns messy business data into predictive models and experiments that drive decisions.

TECHNICAL SKILLS

Core: Time Series, Python, NumPy, Machine Learning
Tools & Platforms: Statistics, Data Visualization, SQL, Scikit-learn
Also familiar with: A/B Testing, Pandas, XGBoost, Git

PROFESSIONAL EXPERIENCE

Zenith Mobility — Senior Data Scientist (01/2023 – Present)
- Created a Recommender Systems prototype using Machine Learning that increased basket size by 43%.
- Developed demand forecasting with Time Series models, improving forecast accuracy by 30%.
- Wrote complex SQL and Pandas pipelines to create analytical datasets from 5TB of event data.
- Partnered with product managers to define KPIs and run Statistics-driven hypothesis testing.

Tech: Python, SQL, Statistics, Scikit-learn, Recommender Systems

Lumen Health — Data Scientist (08/2018 – 12/2022)
- Designed and analysed A/B Testing experiments using Statistics (power analysis, CUPED) for 59 product launches.
- Wrote complex SQL and Pandas pipelines to create analytical datasets from 65TB of event data.

Tech: Python, SQL, Statistics, NumPy, Tableau

KEY PROJECTS

- Customer lifetime value model with XGBoost and Pandas; deployed as a weekly batch job.

ACADEMIC BACKGROUND

- BS in Economics — Georgia Tech (2014 – 2018)
