PROFILE

Data engineer designing reliable batch and streaming pipelines and cloud data warehouses.

SKILLS

Core: Hadoop, SQL, ETL, Airflow, Snowflake
Tools & Platforms: Redshift, Kafka, Python, Terraform
Also familiar with: Docker, AWS, Spark, dbt

PROFESSIONAL EXPERIENCE

Redwood Insurance Tech — Data Engineer (04/2025 – Present)

- Designed streaming ingestion with Kafka and Spark handling 21k events per second.
- Built ETL pipelines with Spark and Airflow processing 39TB per day into a Snowflake warehouse.
- Orchestrated 31 production DAGs in Airflow with data-quality checks and SLAs.
- Wrote Python tooling to validate schemas and monitor pipeline freshness.

Tech: Python, SQL, Spark, Git, Data Warehousing

Nimbus Software — Data Engineer (02/2024 – 03/2025)

- Migrated on-prem Hadoop workloads to AWS (Redshift), cutting infrastructure cost by 19%.
- Provisioned data infrastructure using Terraform and Docker.
- Modelled a dimensional Data Warehousing layer using dbt and SQL, improving report latency by 13%.

Tech: Python, SQL, Spark, BigQuery, Terraform

KEY PROJECTS

- Lakehouse ingestion framework in Python and Spark with automated backfills.

EDUCATION

- Bachelor of Technology in Computer Science — IIT Delhi (2019 – 2023)

CERTIFICATIONS

- AWS Certified Data Analytics - Specialty
- Databricks Certified Data Engineer
