SUMMARY

Data engineer designing reliable batch and streaming pipelines and cloud data warehouses.

CORE COMPETENCIES

Core: Kafka, Hadoop, Redshift, Data Warehousing, Python
Tools & Platforms: AWS, Docker, SQL, dbt
Also familiar with: Spark, Airflow, Snowflake, ETL

EXPERIENCE

Pinecrest Media — Data Engineer (08/2025 – Present)
- Migrated on-prem Hadoop workloads to AWS (Redshift), cutting infrastructure cost by 30%.
- Orchestrated 38 production DAGs in Airflow with data-quality checks and SLAs.
- Wrote Python tooling to validate schemas and monitor pipeline freshness.
- Modelled a dimensional Data Warehousing layer using dbt and SQL, improving report latency by 51%.

Tech: Python, SQL, Spark, Snowflake, Git

Orbital Payments — Data Engineer (11/2023 – 07/2025)
- Orchestrated 29 production DAGs in Airflow with data-quality checks and SLAs.
- Modelled a dimensional Data Warehousing layer using dbt and SQL, improving report latency by 19%.

Tech: Python, SQL, Spark, Redshift, ETL

PROJECTS

- Lakehouse ingestion framework in Python and Spark with automated backfills.
- CDC pipeline from PostgreSQL to Snowflake using Kafka.

EDUCATION

- Bachelor of Engineering in Computer Science — University of Edinburgh (2018 – 2022)
