Hannah Johnson

hannah.johnson@example.com | +91 9821765459 | Austin, TX

PROFILE

DevOps / SRE engineer automating cloud infrastructure, delivery pipelines and observability.

TECHNICAL SKILLS

Core: k8s, Bash, continuous integration, Amazon Web Services
Tools & Platforms: Terraform, Linux, Ansible, Grafana
Also familiar with: Git, GitHub Actions, Docker

EXPERIENCE

DevOps Engineer | Bluepeak Systems | Aug 2025 – Present

- Implemented Observability with Prometheus, Grafana and Datadog; reduced MTTR by 25%.
- Automated configuration management with Ansible and Bash scripts on Linux fleets.
- Led on-call rotations and blameless post-mortems; achieved 99.95% availability.
- Provisioned multi-account Amazon Web Services infrastructure using Terraform (Infrastructure as Code), reducing environment setup from days to 31 minutes.

Tech: k8s, Terraform, Amazon Web Services, Observability, Git

PROJECTS

- Self-service platform for ephemeral environments using k8s and Terraform.
- Cost-reporting tool in Python for Amazon Web Services accounts.

EDUCATION

- Bachelor of Technology in Electronics — IIT Bombay (2021 – 2025)

LICENSES & CERTIFICATIONS

- HashiCorp Certified: Terraform Associate
- Certified Kubernetes Administrator (CKA)
