SUMMARY

8+ years of experience. Data engineer designing reliable batch and streaming pipelines and cloud data warehouses.

TECHNICAL SKILLS

Core: Python, Docker, dbt, Snowflake, SQL
Tools & Platforms: Amazon Web Services, Data Warehousing, BigQuery, Spark
Also familiar with: Hadoop, Airflow, Kafka, ETL

WORK EXPERIENCE

Finch & Co. Technologies — Senior Data Engineer (07/2020 – Present)

- Wrote Python tooling to validate schemas and monitor pipeline freshness.
- Orchestrated 20 production DAGs in Airflow with data-quality checks and SLAs.
- Designed streaming ingestion with Kafka and Spark handling 43k events per second.

Tech: Python, SQL, Spark, ETL, Redshift

Bluepeak Systems — Data Engineer (08/2018 – 06/2020)

- Built ETL pipelines with Spark and Airflow processing 80TB per day into a Snowflake warehouse.
- Provisioned data infrastructure using Terraform and Docker.
- Modelled a dimensional Data Warehousing layer using dbt and SQL, improving report latency by 29%.

Tech: Python, SQL, Spark, Data Warehousing, Terraform

SELECTED PROJECTS

- CDC pipeline from Postgres to Snowflake using Kafka.
- Lakehouse ingestion framework in Python and Spark with automated backfills.

EDUCATION

- Bachelor of Science in Information Systems — National University of Singapore (2014 – 2018)

LICENSES & CERTIFICATIONS

- AWS Certified Data Analytics - Specialty
- Databricks Certified Data Engineer
