PROFILE

10+ years of experience. Java backend engineer experienced in Spring Boot microservices, event-driven systems and enterprise integrations.

SKILLS

Core: Spring Boot, PostgreSQL, Docker, Git
Tools & Platforms: AWS, Java, MySQL, Microservices
Also familiar with: Kafka, REST APIs, continuous integration

EXPERIENCE

Senior Java Engineer | Zenith Mobility | Feb 2025 – Present
- Wrote JUnit and integration tests, raising coverage to 55%.
- Implemented event-driven workflows using Kafka and Spring Boot consumers with exactly-once semantics.
- Led System Design reviews for payment and ledger services.

Tech: Java, Spring Boot, Microservices, MySQL, Git

Senior Java Engineer | Meridian Bank | Apr 2018 – Jan 2025
- Automated builds and releases with Jenkins and Docker; deployed to k8s on AWS.
- Tuned Hibernate mappings and Postgres indexes, cutting query time by 41%.

Tech: Java, Spring Boot, Microservices, JUnit, Hibernate

Java Backend Engineer | Aurora Games | Aug 2016 – Mar 2018
- Tuned Hibernate mappings and Postgres indexes, cutting query time by 39%.
- Wrote JUnit and integration tests, raising coverage to 22%.

Tech: Java, Spring Boot, Microservices, MySQL, Redis

PROJECTS

- Order-management platform: Spring Boot microservices with Kafka and Postgres.
- Circuit-breaker library for Java services.

ACADEMIC BACKGROUND

- MS in Information Technology — NIT Trichy (2013 – 2015)
- BS in Information Technology — University of Waterloo (2009 – 2013)
