PROFESSIONAL SUMMARY

Data engineer designing reliable batch and streaming pipelines and cloud data warehouses.

SKILLS

Core: Python, Kafka, SQL, Git
Tools & Platforms: AWS, Docker, Hadoop
Also familiar with: Redshift, Spark, Airflow

WORK EXPERIENCE

Data Engineer | Atlas Logistics | Feb 2024 – Present

- Modelled a dimensional Data Warehousing layer using dbt and SQL, improving report latency by 26%.
- Designed streaming ingestion with Kafka and Spark handling 9k events per second.
- Provisioned data infrastructure using Terraform and Docker.

Tech: Python, SQL, Spark, Redshift, Git

Data Engineer | Aurora Games | May 2022 – Jan 2024

- Provisioned data infrastructure using Terraform and Docker.
- Wrote Python tooling to validate schemas and monitor pipeline freshness.
- Migrated on-prem Hadoop workloads to AWS (Redshift), cutting infrastructure cost by 41%.

Tech: Python, SQL, Spark, Data Warehousing, BigQuery

PROJECTS

- CDC pipeline from PostgreSQL to Snowflake using Kafka.
- Lakehouse ingestion framework in Python and Spark with automated backfills.

EDUCATION

- Bachelor of Engineering in Information Systems — University of Waterloo (2017 – 2021)

LICENSES & CERTIFICATIONS

- AWS Certified Data Analytics - Specialty
- Databricks Certified Data Engineer
